**Subject:** Re: Dimock GW Site - Summary of Lab Efforts

Eric,

Sue stated that she was ordering the standard. This compound was included in the Tables distributed by Stevie and is a SVOC compound that originally we said could be observed as a TIC. The OSC wanted definitive quantitation so she ordered the standard. I believe Kevin P. is aware of this and maybe your name should have been replaced with Kevin's?? Both Sue and Kevin are in tomorrow so we can discuss then.

Cindy

Err

Slightly confused about

"GC/MS – 1-methynaphthalene standard being ordered. Eric is testing to see if can run as 8270"

Is it supposed to be 1-methylnaphthalene or 2-methoxyethanol?

If 1-methylnaphthalene has someone ordered?

Have no problem running whatever just first time I have heard of 1-methylnaphthalene.

Understand I am going to try to run 2-methoxyethanol by 8270.

THANKS!!

Subject: Dimock GW Site - Summay of Lab Efforts

I prepared a summary sheet for our efforts in supporting the Dimock GW Site. Would you review and make sure I captured the efforts correctly?

I think we could use this when I send out a note to the branch summarizing status??? What do you think?
